

STATEMENT OF SUBSTANCE OF INTERVIEW
U.S. Application No. 09/386,000
Attorney Docket No. Q55595

During the interview, Applicant's representatives expressed concern about possible interpretations of the information request that would result in an unnecessarily extreme burden upon the Applicant (*e.g.*, the lack of any time limits on the requested material). Furthermore, the Examiner was requested to expressly clarify the limits on the information that he was actually requesting.

In response, the Examiner indicated that he wants a citation and copy of each publication which the Applicant (*i.e.*, the inventor) authored or co-authored and publications describing inventions of the assignee (and related business entities) that relate to the claimed subject matter. In particular, the Examiner indicated that he wants information that relates to any large printer designed and/or sold by the Assignee and related business entities prior to 1998, which specifically points out the height of the sheet feeding area of each large printer.

Additionally, the Examiner indicated that he wants information concerning any governmental regulations, rules, guidelines, standards and recommendations in place at the time of the invention regarding the height of large rolls for large printers and the feeding height of large printers, which the inventor (and those involved with the prosecution of the present application) had actual knowledge of and/or followed in designing the claimed subject matter.

Accordingly, Applicant's representatives and the Examiner were able to reach agreement (as set forth herein) with respect to the Examiner's intended scope of the Information Request Under 37 C.F.R. § 1.105.
